

# Blazing Drains™

## INSTALL. FASTER.

**BLAZING™**  
INSTALL FASTER.

**The professional's choice for protection against freeze damage.**

**The most advanced and most complete lineup of automatic drains in the world.**

Increase system quality and peace of mind. Allows water to gradually drain when system is off, protecting against freeze damage. Guaranteed performance for the life of the sprinkler system.

Patented recessed wicking pad protects against rocks and roots. Patented wings for easy, comfortable installation.

Patented rubber gasket design on line drains, swing pipe elbow drains and Siphon Drain™ -

- Gradual drainage avoids soggy patches
- Turbulent flushing action™ with every on/off cycle
- Washer raises up and water is gradually released

# Blazing Drains™

## INSTALL. FASTER.

**BLAZING™**  
INSTALL FASTER.

- Guaranteed operation for life of sprinkler system
- Longer watering season
- Easy, comfortable installation

### Exclusive patented rubber gasket washer drains more gradually than competing drains:

As the irrigation system is pressurized, the rubber washer pushes down and shuts off water flow through drain.

When the irrigation system pressure is off, the rubber washer raises up and water is gradually released.

Released water passes through the patented recessed wicking pad as the soil and plant material absorb the water. The recessed wicking pad - non-woven polyester - protects the drain from rocks and roots.

**Valve gradually releases water - avoiding soggy patches in grass.**

### Lateral Line Drains

**HP 2000** 1/2" MPT  
**HP 3000** 3/4" MPT

"Washer-valve" design. Also includes dirt-stopper screen and easy-install wings. Patented recessed wicking pad. Guaranteed up to 1250 psi burst pressure.

### Main Line Drain

**HP 4000** 1/2" MPT

"Washer-valve" design. With dirt-stopper screen, easy-install wings and patented recessed wicking pad. Guaranteed up to 2500 psi burst pressure.

### Swing Pipe Elbow Drains

**FP 1800** 1/2" MPT x Swing Pipe Barb  
**FP 1900** 3/4" MPT x Swing Pipe Barb

Patented ball-valve design in a spiral-barb swing pipe elbow with automatic drain built in. Turbulent flushing action, dirt-stopper screen and patented recessed wicking pad. Simply install beneath sprinkler heads - save time and fittings.

### Siphon Drain™

**SD 1000** One size fits 1/2" to 1" polyethylene and PVC pipe

"Washer-valve" design. Save on labor, fittings, clamps and cement. Self-pierces, self-seals and clamps onto poly pipe in just three seconds. Or, installs just as fast on PVC after drilling a 3/8" hole. Grommets available for PVC installation.

### All Purpose Drain

**OD-1** 1/2" MPT and 3/4" MPT

"Washer-valve" design. Double screen design keeps out debris. Only drain in the industry with two screens. Lightning grip design for maximum comfort and ease of use. Drain takes all the benefits of multiple drains and combines them into 1. Carry one drain for 1/2" MPT and 3/4" MPT.

### Multi Combo Drain

**OD-2** 1/2" MPT and 3/4" MPT  
1" Poly

Picture Smaller Than Actual Size

For use on ANY Manufacturer's NSF 1" Poly 80#, 100#, or 160# pipe. Standard operating pressures up to the rating of the pipe. Example: 100 PSI on 100# poly pipe. "Washer-valve" design. Double screen design keeps out debris. Only drain in the industry with two screens. Lightning grip design for maximum comfort and ease of use. Drain takes all the benefits of multiple drains and combines them into 1. Carry one drain for 1/2" MPT and 3/4" MPT.
